***Claims Allowed***

Claims 1-7 are allowable over the prior art of record. The claims are allowed because the prior art does not anticipate nor render obvious the invention of a branched power transmission comprising: first and second planetary transmissions each including a sun gear, a planet gear, and a ring gear; a speed change mechanism having a continuously variable transmission ratio and an input side driven shaft and an output side driven shaft; wherein one gear of the first planetary transmission is non-rotatably connected with an input shaft and the first planetary transmission provides a rotational connection between the input shaft, the input side driven shaft, and the output side driven shaft; and wherein one gear of the second planetary transmission is non-rotatably connected with an output shaft and the second planetary transmission provides a rotational connection between the output shaft, the input side driven shaft, and the output side driven shaft.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Prior Art Discussed***

The references cited by the examiner are deemed pertinent to applicant's disclosure. Soehrman '814 shows a pair of bevel gear planetary transmissions interconnected with a belt type CVT, but does not show a ring gear or a sun gear, among other defects. Maurer '340 likewise shows a pair of bevel gear planetary transmissions that lack either a ring gear or a sun gear, among other defects. Doyle '165 shows a variable speed transmission in figure 2 wherein

two planetary gear sets are associated with a belt type CVT, but does not appear to show one planetary gear set having a gear non-rotatably connected to an input shaft, and another planetary gear set having a gear non-rotatably connected to an output shaft.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dirk Wright whose telephone number is 571-272-7098. The examiner can normally be reached on Monday through Friday, 8AM-4:30PM.
